EDUCATION

BASc in Mechanical Engineering with Engineering Management and Entrepreneurship Option

University of Ottawa

BSc in Computing Technology

University of Ottawa

09/2020 – 04/2026

GPA: 9.70/10.00

Awards and accomplishments

- 5 000\$ Dean's Merit Scholarship - Faculty of Engineering for a 95- 100% admission average
- 6x Merit Scholarship of 1000\$ (CGPA above 8.5)
- 2021 Engineering Design Day Winner – Bearing Identification program
- 2025 Engineering Design Day Winner – Guitar Pick Grip
- 2025 Atef Fahim Prize in Engineering Design - Best Mechanical Engineering Capstone Design among 120 students

Raspberry Pi

WORK EXPERIENCE

Product Engineer - Intern

Food Cycle Science Inc.

08/2025 – 12/2025

Ottawa, Canada

- Developed concepts and modeled sub-assemblies using **SolidWorks** for the development of a new product to be released by the company.
- 3D Printed components that were designed to test their functionality and incorporate them in a preliminary product prototype.
- Led the testing and validation of 15 Engineering Build units for the up and coming FC-75 product.

Mechanical Engineer - Intern

Jabil Inc.

09/2023 – 12/2023

Ottawa, Canada

- Utilized **SolidWorks Flow Simulation** to analyze and compare the thermal performance of various radio **heat sink** designs under different wind scenarios (direction and speed). Related results to **thermal simulations** on real radio equipment with thermocouples.
- Led bi-weekly technical meetings to present simulation progress and to provide recommendations to the engineering team.
- **Designed** and optimized **mounting brackets** for 5G radio equipment, ensuring structural integrity and compatibility with specifications.

Manufacturing Automation Engineer - Intern

Pratt & Whitney Canada

01/2023 – 08/2023

Longueuil, Canada

- Developed a **web-based platform** for visualizing and interacting with manufacturing operations on the shop floor, integrating detailed Manufacturing Operation Sheets to demonstrate the benefits of model-based manufacturing methodologies. Successfully completed the project in 4 months using **mySQL, JavaScript, PHP, HTML, and CSS**, and presented the results to **senior leadership** of the company.
- Independently **designed, prototyped** and 3D printed a tool used by an inspection **robotic arm** using CATIA V5. This part will be used by the shop floor inspection team on a frequent basis, completing over **10,000** usage cycles every week.
- Individually developed a Python **point cloud cluster detector** for 3D inspection programs in PolyWorks.
- Independently wrote a **Python** program that can efficiently extract RGB color codes from individual points of a **3D scan** and its **Bitmap**.

Process Improver - Intern

Bombardier Aerospace

05/2022 – 08/2022

Montreal, Canada

- Received an overall internship evaluation of Exceptional from my supervisor.
- Individually developed a **WebDriver automation program** to validate and verify that all 1,000 Bombardier online formations worked correctly.
- Contacted over 100 employees from various countries to update the Bombardier LMS data stored in Excel files and **PowerBI visuals**.
- Individually developed a **WebDriver automation program** to clean up and filter over **20,000 user profiles** in the old Bombardier LMS platform.

PROJECTS

Capstone Project – Tire Handler in partnership with MTS®

Mechanical Design

09/2024 – 05/2025

- Awarded 1,000\$ by the **Atef Fahim Prize in Engineering Design** for the best capstone group design project in the 2025 class.
- Received a 10/10 grade from two Mechanical Engineers supervising the project.
- Mandate and Abstract of the final report can be consulted [here](#).
- Performed stress and weld analysis of the frame of the machine to optimize overall product cost and weight.
- Individually coded 2,000 lines of **MATLAB** code to perform complex modelling and analysis of the tire handler, which automatically updated the thickness and main dimensions of critical parts in a SolidWorks Assembly.

Guitar Pick Grip

Mechanical Design

01/2025 – 05/2025

- Won **1st place** in the 2025 uOttawa Engineering Design Day award for the Makerspace Accessible Art Challenge.
- Invited to pursue the project by presenting the design at the 2025 [Empower Arts Summit](#).
- Presented it myself on [CBC Radio's All In a Day](#), hosted by Alan Neal, in honor of the Empower Arts Summit.

Bearing Identification Program in partnership with GBS®

Web Application

09/2021 – 05/2022

- Won **1st place** in the 2021 uOttawa Engineering Design Day award for bearing identification programs.
- Uses an image measuring Python program that coded to differentiate bearings.
- Communicates with an integrated Data Base that can be modified by the user.
- User Interface was coded in Python with the Anvil Works platform.

OTHER WORK EXPERIENCE

Camp Counsellor

Kids Fitness League

06/2015 – 09/2020

Ottawa, Canada

Tasks and Achievements

- Developed leadership, teaching and organizing skills by managing groups of 20-30 kids throughout the day.
- Learned to prioritize and make better decisions based on which campers required more assistance.
- Developed teamwork and communication skills by working with colleagues in order to plan activities and equipment layouts.

AWARDS AND ACHIEVEMENTS

Alpine Skiing (01/2006 - 04/2019)

- Represented Team Ontario at the Can-Am championships in 2019
- Received numerous sportsmanship awards

- 4th and 5th place during the 2018 Ontario Provincials competition.
- 2nd and 3rd place during the OFSAA 2017 competition.

Martial Arts - Black Belt (2008 - 2013)
